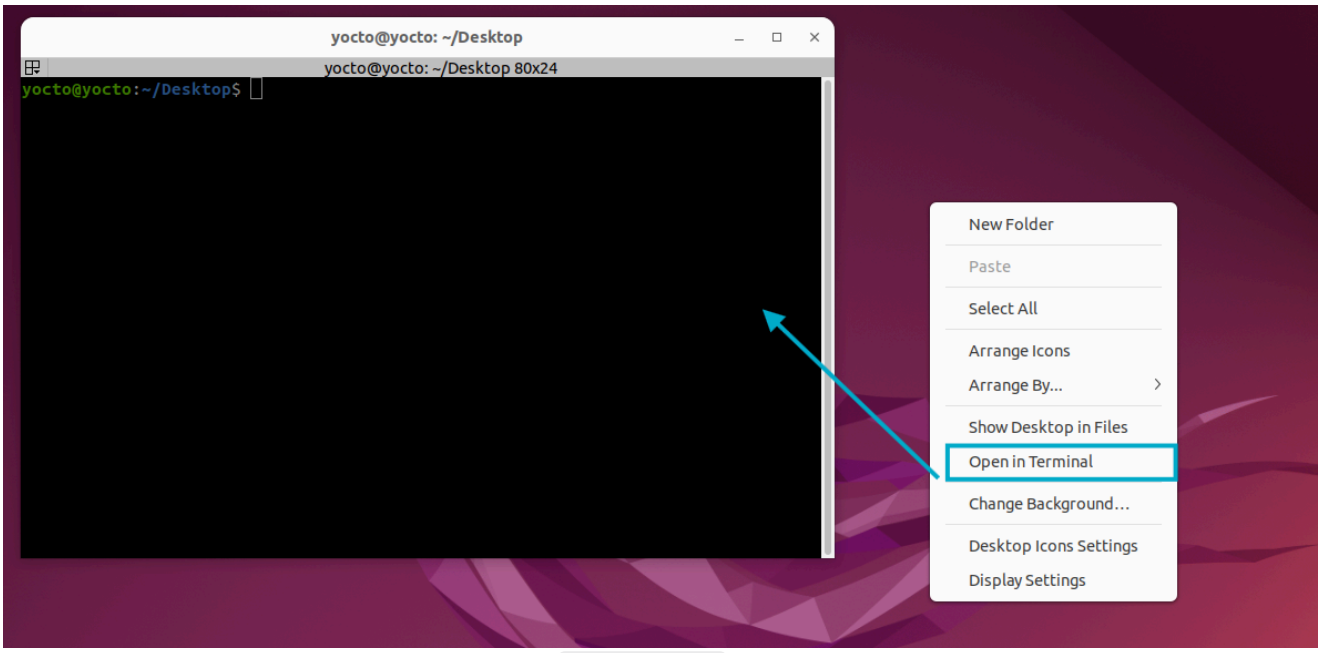
How to use Terminator

How to start Terminal in Linux

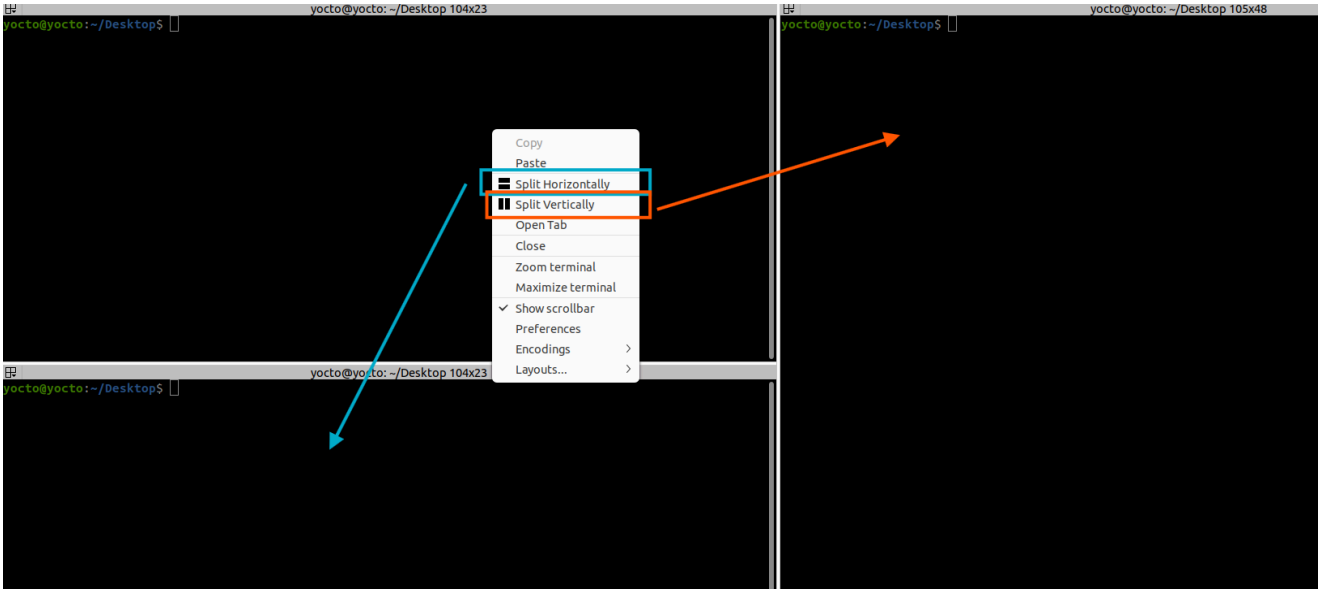
- Right click on the VM's desktop and click on `Open in Terminal` as shown below.



Note: this terminal is configured to run `terminator` utility which allows a bit more customization

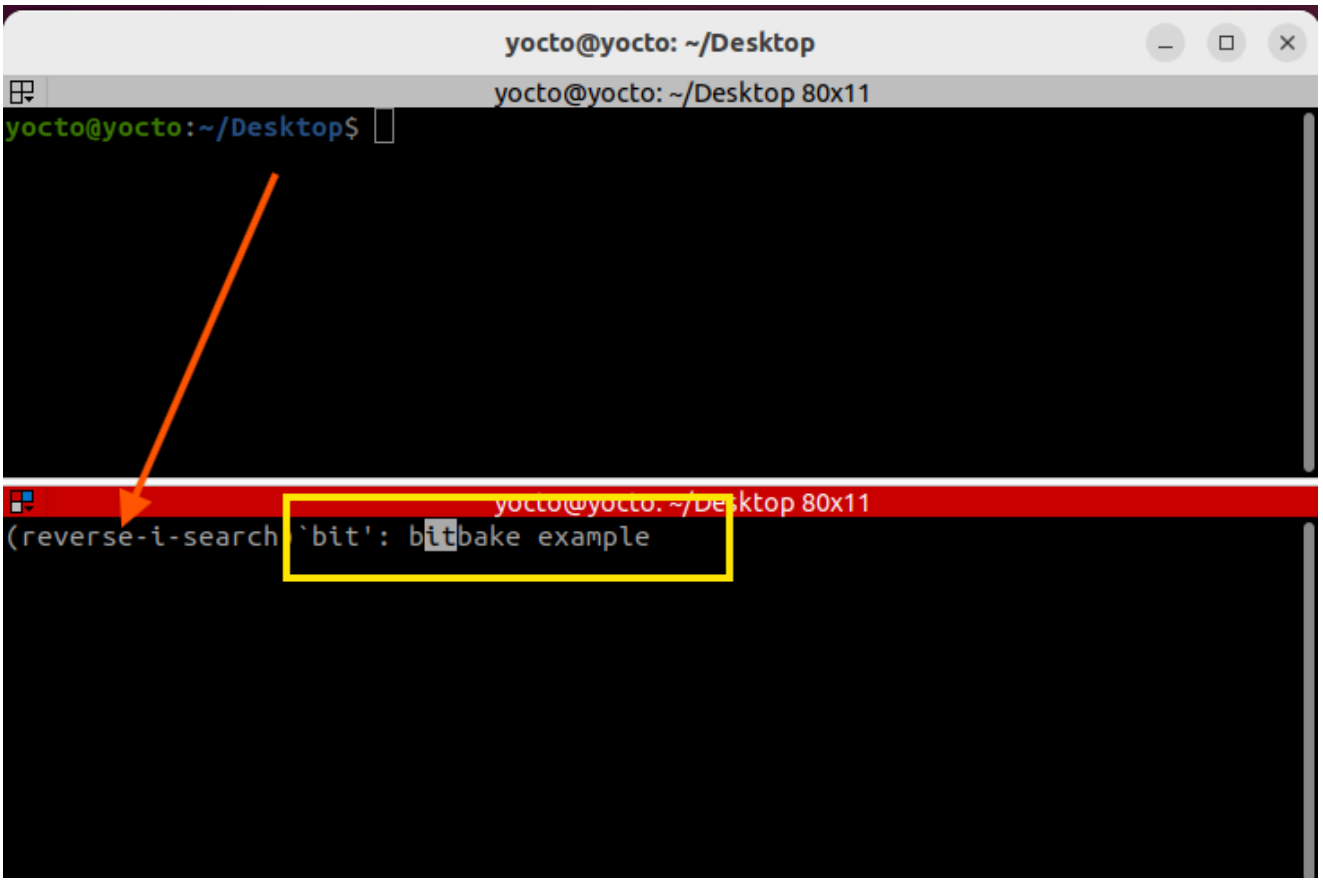
Splitting Terminals

- Terminal can be split into multiple by choosing the options `Split Horizontally` or `Split Vertically` as shown below.



Reverse Search

- Typing `CTRL +R` allows reverse search for previously used commands as shown below.



yocto@yocto: ~/Desktop
yocto@yocto: ~/Desktop 80x11
yocto@yocto:~/Desktop$
yocto@yocto: ~/Desktop 80x11
(reverse-i-search)`bit': bitbake example
